Dear Sir/Madam,

The Digital Pulse Generator was introduced to us with the promise it would significantly improve the life of our batteries in our cars, so we decided to trail it with all our fleet & after 6 months we have reduced maintenance in battery failure “less jump start” and the best part is the savings we have made in this period 52%, we carry less stock because they last longer also less cash flow needed.

We can recommend the Digital Pulse Generator; as it does do what it says it will do.

Yours Truly,

Tuna Guclu

Managing Director

Crown Cabs
